

Web Research

1. Answer questions:

a. How did the W3C get started?

It was started in 1994 by World Wide Web inventor Tim Berners-Lee at MIT in collaboration with CERN. The 1st host to join was INRIA (Institut National de Recherche en Informatique et Automatique).

b. Who can join the W3C? What does it cost to join?

All types of organizations can join to include commercial, educational, and governmental entities as well as individuals. The cost to join is can vary based on the annual revenue, type and location of headquarters of an organization. Fee for United States can go from \$2250 to \$77,000.

c. W3C home page list a number of technologies. *(no longer located on homepage)* Choose one that interest you, click on its link, and read the associated pages. List three facts or issues you discover.

Voice browsing is written in VoiceXML and rendered in a voice browser. It is estimated that over 85% of interactive voice response applications for telephones use W3C VoiceXML. Voice applications benefit people with some disabilities.

2. Visit <http://www.isoc.org> and answer the following questions:

a. Why was the Internet Society created? It was created to fulfill the need to evolve and globalize the Internet and internet technologies and applications and to enhance their availability and use on the widest possible scale.

b. Which local chapter is closest. Visit the website, list the website's URL and an activity or service that the chapter provides.

The closest chapter <http://www.sfbayisoc.org/> One of the service this chapter provides is Grants and Awards to support projects that promote the development evolution, and use of the Internet for the benefit of all people.

c. How can you join the internet society? What does it take to join? Would you recommend that a Beginning Web Developer to join? Joining the Internet Society is easy. You can join the internet society by signing up on their website for free. Yes I would recommend a new web developer join because they can help keep the Internet open, help fight for net neutrality.
